

# Software Development Diploma

Job Ready Program

DURATION

**50**

Weeks

Optional Job Assistance Program

Developers who are skilled in programming languages with a solid foundation are valuable commodities in today's job market. Companies that are expanding their IT departments are demanding more qualified developers, as are technologically focused companies who depend on developers for their core products.

Our Software Development Diploma program is specifically designed to introduce various programming aspects of software development and builds a fundamental understanding of programming practices, functions, and processes. This diploma program focuses on building logical and technical skills that help in efficient software development and understanding.

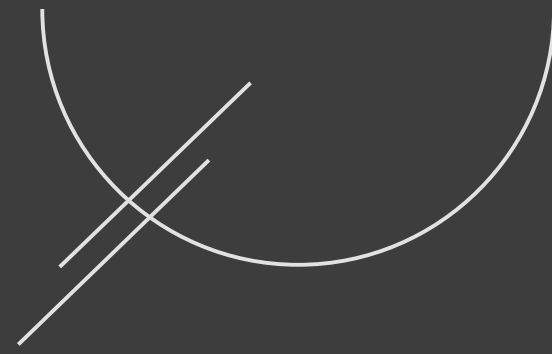

Throughout the program, students gain hands-on experience with a range of software development projects, exercises and decision-making challenges that build in complexity as students add programming skills and languages to their toolkit. The result is professionals with sound problem-solving and decision-making skills who are a huge asset to software professionals.
